## Education

### Matrusri Engineering College

B.E. in Electronics and Communication

Expected graduation date: Aug. 2024

**GPA: 75/100**

Relevant Courses: Analog and Digital Electronics, Communication Systems, Control Systems, Electromagnetic Fields and Waves, Microelectronics.

## Experience

### AiOpenapps

Jul. 2023 - Nov. 2023

#### Full Stack Web Developer

*Reactjs, JavaScript, Firebase, Sanity, Tailwind, Git, GitHub*

- Diving into "AIOpenApps," a project that brings together diverse AI applications in one unified platform, simplifying exploration and fostering collaboration.
- Built with precision using React and Tailwind for a seamless and responsive interface, AIOpenApps leverages Firebase for robust database management and authentication, ensuring a secure and efficient user experience.

### Conntog

Nov. 2022 - Jun. 2023

#### Frontend Web Developer

*Reactjs, Nextjs, TypeScript, Tailwind, JavaScript, HTML, Git, GitHub*

- Developed a couple of website's Frontend on Reactjs and Nextjs and a professional Git/GitHub workflow.
- Experienced in collaboration, I've seamlessly integrated Conntog and explored diverse frameworks and technologies within the AIOpenApps project. My journey has been enriched by the contribution of skilled group members, collectively striving for excellence in this dynamic development environment.

## Projects

### AIOpenApps

Jul. 2023 - Ongoing

#### AIOpenApps: All your AI applications in one place.

*Reactjs, Tailwind, Firebase, Sanity, Git*

- Engineered AIOpenApps as a comprehensive platform, bringing together a myriad of AI applications for seamless accessibility and exploration.
- Utilized Firebase, Sanity, and advanced frontend frameworks to ensure a dynamic and innovative user experience within AIOpenApps.

### Leetcode Clone

Jun. 2022

#### LeetCode clone for honing coding skills with diverse challenges.

*Nextjs, TypeScript, Firebase, Git*

- Developed the LeetCode clone using NextJS and TypeScript, providing a robust foundation for a modern, efficient, and type-safe coding environment.
- Leveraged Firebase to enhance the LeetCode clone, ensuring secure user authentication and efficient database management for a seamless and dynamic coding experience with NextJS and TypeScript.

### Add to Cart Web App

Aug. 2021

#### Firestore-powered cart with animations.

*HTML, CSS, JavaScript, Firebase, Git*

- Engineered an "Add to Cart" project with Firestore integration, enabling the seamless fetching and deletion of information. This dynamic functionality enhances user interaction and data management.
- Incorporated Lottie animations to elevate the user experience, adding visual appeal and interactivity to the "Add to Cart" project, making it both functional and engaging.

### ECE Notes

Jan. 2021

#### Crafted an ECE web app using for efficient access to study materials.

*Nodejs, Expressjs, HTML, Bootstrap, Git*

- Developed an ECE notes app with Node.js, Express, and MongoDB, facilitating centralized access to study materials for streamlined academic resource management.
- Implemented Twilio integration in the app, enabling seamless communication by handling user queries and providing owner notifications, enhancing the overall user experience.

## Achievements

**CBIT Hacktoberfest 2023 Hackathon Winners (COSC).**

Oct. 2023

### *Event Management Web App*

- Team 55 clinched victory in the CBIT Hacktoberfest 2023 Hackathon, crafting a cutting-edge event management web app. My role focused on frontend development, ensuring a sleek and user-friendly interface.
- Leveraging MongoDB, Node.js, and Express.js, our winning project showcased technical prowess in creating a robust and efficient event management solution during the hackathon.

## Skills

### **Languages & Tools:**

Python, HTML, CSS, JavaScript, TypeScript, Reactjs, Nextjs, Nodejs, Expressjs, Firebase, Tailwind, Bootstrap.

### **Certifications:**

JavaScript Algorithms and Data Structures.

Responsive Web Design.
